

SGP INTERNATIONAL

Systems for Information Management

GREEN SINCE 1987

FINANCE | HEALTHCARE | INSURANCE | NON-PROFIT | REAL ESTATE | RETAIL

Our mission is to integrate and streamline business practices using information systems as a tool to transform and enhance all facets of daily operations.

Collaborative

From drafting business requirements to delivering hands-on, responsive support, SGP provides unparalleled and personalized customer service. We work as trusted advisors to assess strategic initiatives and opportunities.

Technical Insights

SGP's business acumen allows us to adapt to changing technologies and market trends. We deliver innovative, leading edge technical solutions. Clients depend on SGP for reliable and secure system architecture.

Proven Results

Our trusted approach to operational synergies demonstrates a track record of dependable and cost effective results. We nurture relationships and experience repeated success through consulting and customized solutions.

Flagship Applications

DataQuest Data Mining and Reporting Tool

DataQuest is a powerful business intelligence tool that links to diverse data sources and easily creates On Line Analytical Processing (OLAP) cubes used for critical analysis and trending, as well as customized and robust reporting.

Document Compliance System

DOX is designed to efficiently generate, track and maintain all document, covenant and tickler requirements. The system mitigates risk and provides confidence to auditors and rating agencies through automation.

Real Estate Deals System

REDS oversees the running of real estate loan portfolios. Deals are tracked from approval through expiration. The version-based operating memorandums, escrow administrator and on-demand reporting allow for oversight and control.

APG Interface Management Solution

For outpatient departments and treatment centers, AIMS supplies an interface between clinic billing and prospective APG Medicaid reimbursement. Providers can operate effectively and reconcile revenue.
